

Radian BioEnergy Announces the Appointment of a Board of Advisors

SALT LAKE CITY, Utah (January 29, 2009) – Radian BioEnergy, a leading technology developer and supplier of advanced *gasification systems* using organic and industrial waste feedstocks, announced the creation of their Board of Advisors which includes several key industry leaders. New advisors Richard Boardman, Benjamin Levie, Ryan Waddington and John Baird offer a wealth of knowledge and experience in key areas of technology, gasification systems and energy investment. Their contributions will aid the company's success as Radian BioEnergy transitions into the next phase of its development and cements its position as a leader in innovative technological solutions that will provide sustainable energy while protecting the environment for current and future generations.

"We are proud to welcome such distinguished and respected members to our Board" said Benjamin Phillips, President of Radian BioEnergy. "Their unique qualities and collective experience will be of great value to the Company."

The members of the Board of Advisors are:

Richard Boardman, Ph.D.

Dr. Boardman is presently the Energy Security Initiative Lead at the Idaho National Laboratory (Idaho Falls, ID) establishing capabilities and resources to support clean, reliable, efficient, and secure energy development. He is also the R&D Lead for Gasification & Alternative Fuels at INL. Dr. Boardman is leading the development of simulation-driven design tools for understanding and implementing integrated energy systems (nuclear / fossil / renewable). Dr. Boardman received his Ph. D from Brigham Young University.

Benjamin Levie, Ph.D., P.E.

Dr. Levie earned his Ph.D. and MS degrees in chemical engineering from the University of Colorado and has been actively involved in alternative energy research and development since 1981. He is currently the Feedstock Technology Manager for Catchlight Energy, LLC (A joint venture between Weyerhaeuser & Chevron) leading a multi-discipline team to produce sugars, ethanol, and lignin from forest and waste materials.

Ryan Waddington, MBA

Mr. Waddington is a Director at ZBIV which is the private equity arm of ZBI and is exclusively focused on energy and energy-related investments. Prior to joining ZBIV Ryan was Director of Venture Services for NextEnergy, a non-profit corporation founded to advance the alternative energy technology industry in the State of Michigan. Ryan earned a B.S. in Aerospace Engineering from the University of Michigan and a M.S. in Civil and Environmental Engineering from the University of Wisconsin. He also earned a MBA with Distinction from the Ross School of Business at the University of Michigan.

John K. Baird, JD

Mr. Baird has served as corporate counsel for a national energy services corporation. He also served as Vice President of Liquid Fuels for Headwaters Incorporated and directed the development, financing and operation of a major domestic bio-fuels plant. Prior to his involvement in the energy sector, Mr. Baird was engaged in the private practice of law for over twenty years. He also serves as counsel to a sitting delegate to the U.S. Senate with responsibilities in energy and banking. Mr. Baird received his JD from Brigham Young University.

About Radian BioEnergy

Radian BioEnergy's vision is to provide sustainable clean energy technologies that contribute to both domestic and global green energy production. Radian has developed innovative gasification energy technologies that will make real and lasting contributions to the world's energy needs while minimizing the impact on the environment. Radian's environmentally-friendly technology is cost effective and serves multiple market segments including industrial heat/steam applications, renewable power and second generation biofuels.
